Small Cremone Bolt With Egg-Shaped Knob in Polished Brass, Lacquered

SKU: 1275-US3
Brand: Gruppo Romi

Most popular polished brass, lacquered cremone with egg-shaped knob in a smaller size suitable for windows and cabinets up to 84" tall. Upon installation, rods may be cut to size.

Made in Argentina.

These are functioning cremone bolts. The knob turns clockwise almost 180 degrees retracting or extending the rods 5/8" at each end. When the rods are in the extended position, they enter the strike plates, and the door or window is held shut.

For outswinging windows, make sure there is sufficient room for the knob to turn 90 degrees without hitting the window stop or pinching your fingers.

These cremone bolts are partially handmade, which gives each piece unique character and subtle irregularities that reflect the craftsmanship behind them.

Includes: functioning cremone case with knob, two rods, five rod guides (which may be used as surface strikes), one mortise strike, one universal strike, one angle strike (for outswinging applications), and screws.

Extra rod guides and strikeplates may be ordered separately.

Dimensions:
> Box size: 4-5/16" tall x 1-1/4" wide x 2-5/16" total projection.
> Knob: 2-5/16" tall x 1.32" wide.
> Upper rod: 43-1/4" long.
> Lower rod: 39-3/8" long.
> Rod width: 1/2".
> Maximum extended length: 84-3/4".
> Retracted length (with uncut rods): 83-1/2".
> Maximum opening size: 84".
> Rod guide/surface strike: 13/16" tall x 1-1/4" wide.
> Universal strike: 1-1/2" wide x 1-1/16" deep.
> Mortise strike: 1-1/2" wide x 9/16" deep.
> Angle strike: 1-1/2" wide x 13/16" deep with a 5/16" lip.
